

This week in....**Science**

This week we learned more about the incubator and our chick eggs. We discussed the importance of the incubator and learned about the parts of a chick egg. Ask your child about the parts of a chick egg!

We are also tracking the growth of our chick eggs each day. This week our chicks developed feather buds and their beaks began to form! We also candled our eggs again to check on the growth of the chicks. We are not so patiently awaiting the arrival of our chicks!

Ask your child about...**Caring**

We are focusing on the Character Counts Pillar of **Caring** for the month of April.

Caring is... Be kind • Be compassionate and show you care • Express gratitude • Forgive others • Help people in need

Celebrate with your child when you see them making caring choices!
