

This week in....**Science**

Mrs. A came last week to set up the incubator with our chick eggs. The eggs will hatch in approximately 21 days! This week we learned that our chicks had a heartbeat by day 3. We will candle our eggs later this week. Ask your child what it means to candle the eggs!

The chicks will hatch when we return from Easter Break. We are eagerly counting down until the hatch date!

Ask your child about...**their Animal Research Project**

Each student has been researching an animal for our animal research project. Students have learned a lot about their animal! Ask your child about their animal. Some other questions you could ask your child:

- Where does your animal live?
- What does your animal eat?

Important Dates

Thursday, April 6: Spell-a-Thon
pledge packets due

Friday, April 7: Spell-a-Thon spelling
test

Thursday, April 13: Early Dismissal –
2:00/2:20
