

# March

## Important Dates

Tuesday, March 14: A Brown Bear, A Moon, and A Caterpillar at Luther College

March 20-24: Spring Break!  
NO SCHOOL

Thank you for attending conferences! I loved the chance to share the growth I have seen in your child this year. We will continue to work hard as we finish 1<sup>st</sup> grade!

### This week in... **Guidance**

Students learned that "It's OK to Back Away" in guidance this week. Mrs. Luzum talked with students on how to deal with "yucky" feelings. We learned different ways to help us relax when we feel angry, frustrated or upset. Students also watched a Howard B. Wigglebottom story and learned how Howard dealt with yucky feelings. Ask your child about strategies they can use to back away when they are frustrated!

### This week in... **Math**

Students worked on solving addition story problems. Students used their mind, cubes, base 10 blocks or pictures to solve the story problems in a way that made sense to them. We will begin working on more subtraction strategies next week. We will also continue to work on addition and subtraction fact fluency.

For those of you joining us on our Luther College field trip – look for information coming home next week. You will be provided with a map as well as parking information.
